1 UV Light Efficacy AES/MIC/SOP 78.0 Passes the Test

(Micro Organisms Tested) SUMMARY FOR UV LIGHT EFFICACY TEST (Reduction of 99.9%)

S. No.	Micro Organisms Used	Control Count in cfu without exposure	Test Count in cfu with 3 min. exposure	Reduction in % (As Compared to Control at time Zero)
1	Staphylococcus aureus	2.1 x 10 ⁷	60	>99.99
2	Escherichia coli	5.8 x 10 ⁶	40	>99.99
3	Pseudomonas aeruginosa	4.6 x 10 ⁷	1.1 x 10 ²	>99.99
4	Salmonella enterica	2.4 x 10 ⁶	80	>99.99
5	Bacillus subtilis	9.2 x 10 ⁶	20	>99.99
6	Vibrio cholerae	1.6 x 10 ⁶	30	>99.99
7	Shigella	3.9 x 10 ⁷	1.4 x 10 ²	>99.99
8	Faecal streptococcus	7.4 x 10 ⁶	20	>99.99
9	Hetrotrophic Plate Count	4.6 x 10 ⁷	580	>99.99
10	Candida albicans	6.6 x 10 ⁶	5.9 x 10 ²	99.1
11	Aspergillus brasiliensis	1.2 x 10 ⁷	50	99.5

Remarks: On the basis of above study the UV Light fitted in Bottle kills > 99.9% of Gram -ve and gram +ve bacterial count and is much effective against bacteria as per standard. This UV Light is also effective against Fungal Count, It kill >99% of Fungal Count in 3 min. of expose time.

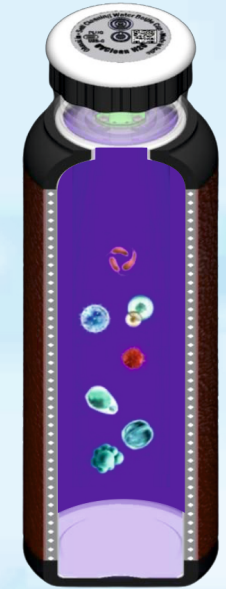

Note: For Combined Bacterial Load this UV Light is also tested for Hetrotrophic Plate Count which shows reduction of >99.9%
